1. The following is an examiner's statement of reasons for allowance: Guetzkow is the closest art of record. As seen from figure 8, the cutter 20 is a flat piece which has cutting edges cut on both ends. The cutting edges are designed such that one set of cutting edges is used as the spindle is rotated in one direction until those cutting edges become dull. Then, the cutter is flipped end to end to bring the fresh cutting edges to the front of the spindle, and the spindle is rotated in the opposite direction. See page 4, lines 23-48 of Guetzkow. The cutter may be resharpened over and over again, until virtually the entire length of the tool is consumed. Lines 23+ of the above section discuss the reduced cost of manufacture and maintenance of such a cutter. It is noted that claims 1, 12, and 22 of the present application set forth the concept that the first and second blades cut two different profiles, but Guetzkow cuts the same profile no matter which way the spindle is rotated. While double ended tools having different sizes are known (see Redinger '132), providing Guetzkow with cutting sizes of different diameters would destroy the purpose of Guetzkow's invention as discussed at the above mentioned section of page 4. There is no suggestion to provide Guetzkow with two different cutting profiles which cut two different shapes on a workpiece.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Claims 1-23 are allowed.
